# Shape your space with our experts.

## A human-focused, tailor-made, design service.

No two projects are alike – every space has its own challenges that must be addressed in order to create truly beautiful design. However, creative floor designs can be a really impactful way to bring a design vision to life.

Interface Design Studio can support you in finding beautiful, flooring solutions to help achieve your project requirements within your allocated budget.

All the support we offer is bespoke to the project and the designer, which can include creating custom colours, products or mood boards. We can get involved in just a single phase of the process or offer design support from start to finish.

Find out more at [www.interface.com/designstudio](http://www.interface.com/designstudio)

Carbon Neutral Floors™

# Choose flooring that respects the planet.

We know the impact our flooring has on our planet, whether carpet tiles, LVT or nora® rubber flooring.

It's not just heating and cooling buildings that adds to carbon emissions, but the materials and processes used to create and maintain them. And that includes flooring products.

Reducing this 'embodied carbon' is the most urgent challenge of all. Since 1994, we've been leading our industry in reducing the carbon footprint of our products to become the lowest in the industry through their full lifecycle. And we balance the emissions we still can't avoid by supporting carbon-offset projects in renewable energy, fuel switching and reforestation, to keep carbon in nature and actively removing it from the atmosphere.

Find out more at [www.interface.com/carbonneutralfloors](http://www.interface.com/carbonneutralfloors)

CQuest™ Bio Backings

# CQuest™ Bio backing is standard on all our carpet tiles.

Whatever Interface modular carpet tiles you choose, CQuest™ Bio provides the perfect backing.

We're now using CQuest™ Bio backing across all our carpet tiles.

Made with an average of 88% recycled and bio-based content, our carpet tiles carbon footprint has been lowered by 1/3rd. CQuest™ Bio backing can easily be recycled to make new backings at the end of their life.

Find out more at [www.interface.com/cquest](http://www.interface.com/cquest)

# Everything. Carbon Neutral.

**Interface® is now a third-party certified  
Carbon Neutral Enterprise.**

As the first and only flooring manufacturer to achieve third-party Carbon Neutral Enterprise certification, Interface neutralised its carbon impact across its entire business, including all operations and its full value chain. The Carbon Neutral Enterprise certification builds on our history as a purpose-driven flooring company and sets the stage for our future, guiding everything we do.

Find out more at  
[www.interface.com/carbonneutralenterprise](http://www.interface.com/carbonneutralenterprise)

nora® Rubber Flooring

# High-quality rubber floor coverings.

**Floor coverings with expertise in sustainability, functionality and design.**

nora® floor coverings are made of high-quality natural and industrial rubber. They are mixed with minerals from natural sources and other components, such as colour pigments, pulled into blanks, pressed and then vulcanized under heat and high pressure.

Due to the special properties of rubber, nora® floor coverings don't require phthalate plasticisers and don't need to be coated. In addition, nora® floor coverings are slip resistant and highly flame retardant (acc. to EN 13501), exhibit outstanding ergonomic properties and absorb footfall sounds. They retain their unique functionality and aesthetics for decades.

The floor coverings are rounded off by an unparalleled range of accessories and an outstanding service for a design that is both harmonious and cross-functional - across all surfaces, stairs and levels.

See the full product line at [www.nora.com](http://www.nora.com)

nora® Rubber Flooring

# norament® tiles, the pioneer among rubber floor coverings.

norament®, the classic rubber flooring is a convincing combination of sustainable quality and outstanding functionality. Pressed under high pressure, the tiles present a very dense, closed surface. This makes them extremely resistant to wear for the hardest requirements over decades.

The Workbook 2023/24 is printed on **100% recycled paper**.

By using carbon balanced paper for the Workbook 2023/24 we have balanced through World Land Trust™ the equivalent of **12,825 kg of CO<sub>2</sub>**. This support will enable World Land Trust to protect and restore **2,450m<sup>2</sup> of threatened tropical habitat**.

www.carbonbalancedpaper.com  
CBP003294

All the pictures in Workbook 2023/24 are represented as accurately as the printing process will allow. Please order a sample tile to check the exact colour of our product before ordering.

Interface European Manufacturing BV reserve the right to change or modify specifications. Please see website for latest specifications.
